DETAILED ACTION

REPEATED REJECTIONS

1. The 35 U.S.C. 103 rejections of claims 1 and 3-8 over Gotz in view of Vercesi are repeated for the reasons previously of record in the Office Action mailed May 15, 2003, Pages 5-8.

Regarding the newly added limitation that the short aramid fibers are fibrillated and has a surface area of at least $3\text{m}^2/\text{g}$, Vercesi teaches that the short aramid fiber are fibrillated and the surface area is greater than $3\text{m}^2/\text{g}$ (col.5, 1.22-26 and col.7, 1.14-17).

2. The 35 U.S.C. 103 rejection of claim 9 over Gotz in view of Vercesi and Van Ert are repeated for the reasons previously of record in the Office Action mailed April 29, 2004, Pages 3-5 Paragraph 5.

Regarding the newly added limitation to claim 1 that the short aramid fibers are fibrillated and has a surface area of at least $3\text{m}^2/\text{g}$, Vercesi teaches that the short aramid fiber are fibrillated and the surface area is greater than $3\text{m}^2/\text{g}$ (col.5, 1.22-26 and col.7, 1.14-17).

ANSWERS TO APPLICANT'S ARGUMENTS

3. Applicant's arguments regarding the 35 U.S.C. 103 rejections of claims 1 and 3-8 over Gotz in view of Vercesi have been fully considered but they are not persuasive.

In response to Applicant's argument that Gotz fails to teach specific dimensions for the aramid fibers, the Examiner agrees and it is stated in the repeated rejection that Gotz fails to explicitly teach the dimensions of the aramid fibers. However, Gotz teaches that aramid fibers are used as reinforcement in forming hollow articles, and suggests that the fibers used are short. Vercesi et al teach specific dimensions of short aramid fibrillated fibers used to reinforce thermoplastic molding materials. Therefore, one of ordinary skill in the art at the time Applicant's invention was made would have recognized that the short aramid fibers of Vercesi et al are substituted for the aramid fibers of Gotz, in order to reinforce the thermoplastic molding materials for forming hollow articles as taught by the teachings of Vercesi et al and Gotz taken as a whole.

In response to Applicant's argument that Van Ert fails to cure the deficiencies in Gotz and Vercesi, the Van Ert reference is only used for the limitations of claim 9 because Gotz and

Vercesi teach all that is claimed in claims 1 and 3-8 as shown above.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
